

··· First pilot (2009) | Nationwide (baseline) (2014)
 - - - Product-table date (2012) | Full-scale (2017)

Note: Paddy rice, national series, 1991–2024, expressed as the log difference from 2008, the last year before the first pilot. Rice is a single treated crop, so no difference-in-differences inference is reported; its insurance timing also overlaps with rice-specific policies. Vertical lines mark alternative dates from the treatment-coding input. Descriptive only. Source: KOSIS Crop Production Survey (national series); author's calculations.
