

[Figure 7] Insured-to-Normal Yield Ratio, Eight Largest Fruit Crops, 2024

Note: APFS 2024 fruit contract-detail file (336,232 rows; 12,099 exact duplicate rows; no contract identifier). Crop disaster insurance only; records with a missing or non-positive insured or normal yield are excluded. 'Equal to 1' = ratio within ± 0.0005 . Shares are taken from the supplied crop-level summary; the raw record file is not part of the verified bundle. Descriptive only. Source: Korea Agricultural Policy Insurance & Finance Service (APFS), public data; author's calculations.
