

Note: APFS public national series: area enrollment rate 2001–2024; loss ratio 2001–2023 (indemnities paid / risk premium × 100, recomputed from the same file). Enrollment rate 2025 and loss ratio 2024–2025: MAFRA (2026), same definitions (the release reproduces the APFS 2024 values). The eligible-area denominator of the enrollment rate expands as crops are added, so the rate is not comparable across years without adjustment. Dashed line: loss ratio of 100%. Descriptive only. Source: Korea Agricultural Policy Insurance & Finance Service (APFS), public data; Ministry of Agriculture, Food and Rural Affairs (MAFRA), press release of 2 February 2026; author's calculations.
